

HVAC & Metals Institute

ITI's "HVAC PRO" Calculator

Course Requirements:

Participants are encouraged to buy their own calculators prior to class (although you can just sit and watch, if you like). The calculators come with detailed instruction booklets that can be studied in advance. The calculator is available for \$27 (half-price) to those who take this class.

Course Description:

Participants will learn to input information into the new calculator from the International Training Institute (ITI). This calculator was made with the input of union sheet metal workers, for union sheet metal workers. It does more than the average construction calculator, at half the cost (\$53.00). The calculator has functions for ductwork offsets, roof pitches, Fan Laws, radius stretch outs, construction math (feet, inches, metric), stair and framing layouts, etc.

Schedule (2 night class):

- March 3rd, 5th 5:00 – 8:00
